

Free Car Care Workshop

Do you have a teenage driver at home? Do they know about car maintenance? What if something goes wrong....a flat tire or a dead battery. Do they know what to do? Do they know how to keep safe?

Join us Saturday

September 27th

At 1:00pm

Our Workshop will go over basic car knowledge and maintenance. Students will learn how to change a tire, check fluid levels and tire pressure.

We will also help answer questions like do I really need to change my oil every 3,000 miles, and why or why not? What other fluids should I be changing, and how often?

We will go over safety concerns and distracted driving too!

**Please call to reserve
